

CLIP INSTALLATION INSTRUCTIONS FOR PLATE MIRRORS

1. Determine the exact location for your mirror on the wall.
2. Install the bottom clips using the picture on the right to locate them.
3. Set mirror in bottom clips, center it, and use a pencil to mark the top of the mirror on the wall.
4. Remove the mirror and drill holes for the clips $3/8''$ below your pencil mark. Insert wall anchors and tap them firmly in holes. Screw clips to wall snugly, but do not tighten screws too much. Only tighten enough so that you can slide the clip up and down without too much effort.
5. Set the mirror back into bottom clips and gently tap the top clips over the top edge of the mirror.
